HEADSET SOLUTIONS

Jabra headsets combine the best of technology and design to give you innovative tools with excellent sound quality and great comfort. Whether it's optimal sound for a contact center, wireless talking when you're at work, or your favorite hits when you're not; we assure you high-performing products with a quality and design that will empower you to discover freedom.

EIGHT GOOD REASONS TO INVEST IN A JABRA HEADSET SOLUTION

PRODUCTIVITY

Experience the freedom and increased efficiency from hands-free communication. With a headset you can continue working productively, while talking with both hands free. Complete multiple tasks quickly and easily, improving the speed of daily work.

SOUND CLARITY

Experience consistently superior call sound clarity with Jabra headsets that incorporate the finest in acoustic technology. All headsets feature PeakStop™ technology. Combined with noise-canceling microphones this ensures that you hear and are heard clearly.

SECURITY

All Jabra wireless office headsets digitally encrypt the signal between headset and base. This guarantees conversation confidentiality where you can talk freely, confident that the only people listening in are the ones you're talking to.

DURABILITY

Choosing a high-quality Jabra headset gives you full reliability. It will not only save you in replacement costs, but you will also be spared downtime and repair hassles. Jabra headsets are built to last. Every headset is subject to extensive testing before launch, everything from cable flexing over boom arm rotations to acoustic tests. And our standards are as tough as our headsets.

MOBILITY AND RANGE

Enjoy freedom of movement with our wireless headsets offering an unparalleled office range of up to 150 meters. Untie yourself from the limitations of traditional office telephones. Create a more efficient workspace where you can talk and still walk around effortlessly gathering information.

CONFERENCE CALLS

The Jabra GN9350e and the Jabra PRO™ 9470 offer the optimal solution for conference calling. Up to four people can take part in a wireless conference call by docking their headsets in the base of the caller, and continue to talk with clarity from anywhere in the office environment.

COMFORT

Headsets with carefully adjusted acoustics, lightweight structures and ergonomic design plus a selection of wearing styles to match the needs of any user makes it easier and more comfortable to make and take calls at work. A headset provides comfort and helps to avoid aching muscles and neck strain from cradling the telephone handset between head and shoulder.

TALK TIME

All Jabra wireless headsets provide day-long talk time with the headset charging in the base between calls. All models in the Jabra GN9300e Series offer interchangeable batteries as an accessory, which enable unlimited talk time, keeping you connected around the clock.

WHICH HEADSET IS RIGHT FOR YOU?

Four steps is all it takes to simplify the purchase decision and discover the best combination of headset options for your business. Although we have an exceptionally wide range of solutions, please note that not all combinations are possible. For example, if you want a headset with stereo sound, you need two earpieces. Follow the four steps and check the chart on opposite page to see which headset best fits your needs.

1. WIRELESS OR CORDED?

Wireless headset solutions are ideal if you:

- Want the freedom to work at your desk and move about the office. Grab a cup of coffee, get the paper in the printer or go and consult with a colleague without missing a call
- Want a sleek, attractive headset design without cords see the need for multi-unit conferencing capability

Corded headset solutions are suitable if you:

- Work only at your desk
- Want the best possible inbound sound quality in one or both ears
- Want Hi-Fi stereo quality

2. WORKING IN NORMAL OR EXTRA LOUD ENVIRONMENT?

Three different business-grade microphones are available to ensure your voice is transmitted clearly, no matter which environment you work in.

Omnidirectional microphone

- Ideal for use in most normal office environments

Noise-canceling microphone

- Great for use in noisier, open office environments

Ultra noise-canceling microphone

- Ideal for use in very noisy environments where back ground noise can interfere with your calls
- And if colleagues are seated close to each other

3. WANT SOUND IN ONE OR BOTH EARS? - MONO OR DUO

Do you want to listen to sound through one ear or two?

Do you want stereo sound, or is mono sufficient?

Sound in one ear - mono

- Ideal if you like to be aware of what's going on around you during a phone call

Sound in both ears - duo

- Ideal if you only want to hear the caller's voice and want to close out surrounding noise

4. WHAT'S YOUR PREFERRED WEARING STYLE?

Select the headset solution with the wearing style(s) that's right for you. Many GN Netcom headset solutions even offer interchangeable wearing styles, letting you switch style at any time.

Headband

- Fully adjustable, over-the-head wearing solution

Earhook

- Flexible earhook that gently and comfortably holds the receiver to your ear

Neckband

- Wearing style worn behind-the-neck

Interchangeable: 2-in-1

- The 2-in-1 offers you two wearing styles in one headset: headband and earhook

Interchangeable: 3-in-1

- The 3-in-1 offers you three of wearing styles: headband, neckband or earhook

JABRA GN2000
SERIES

JABRA LINK™ MOBILE

Jabra LINK MOBILE is a series of connection cords that allow you to use your mobile phone together with a professional corded Quick Disconnect (QD) Jabra headset from GN Netcom.

The cords offer simple plug-and-play connectivity. There is no need for pairing like with a Bluetooth device. Just plug the cord into your mobile phone and you are ready to talk! Jabra LINK MOBILE cords feature in-line control buttons to answer/end calls. The cords connect to virtually all professional corded Jabra headsets with a QD interface, including Jabra GN1900, Jabra GN2000 and Jabra BIZ 2400.

ULTIMATE SOUND AND CALL COMFORT

Designed for all-day use in offices and contact centers, corded Jabra headsets offer the ultimate in audio performance, comfort and durability. Moreover, you will benefit from Peakstop™ hearing protection and unrivalled ultra noise-canceling technology. In fact, corded Jabra headsets combat background noise so effectively that you can do a mobile phone call from a busy hotel lobby – and sound like you are in a quiet office!

COMPATIBLE WITH LEADING BRANDS OF MOBILE PHONES

Jabra LINK MOBILE cords are available for a wide range of mobile phone brands including Blackberry, iPhone, Nokia, Samsung and Sony Ericsson.

JABRA A330

UNIFIED COMMUNICATIONS

Unified Communications™ (UC) describes a situation in which technologies such as voice, email and instant messaging are integrated, and presented to the user via a single intuitive user interface. The idea is to enhance productivity and facilitate cooperation by unifying and streamlining the way we communicate.

One of the things that make UC so attractive is that it facilitates collaboration. The combination of a common interface and greatly improved sound quality increases the sense of proximity, regardless of location.
